### Introduction

Derman medical publishing annually rewards the original and scientific articles printed in the "Journal of Clinical and Analytical Medicine (JCAM)" and "Eurasian Clinical and Analytical Medicine (ECAM)", which are owned by the company, as "The Best Article of The Year". In 2013, 1445 articles have been submitted with the intention of being printed. Accepted articles have been published online averagely in ten days and by wet print in a year. In article evaluation procedure due to our restricted resources, many of them had to be rejected unintentionally. In this period we have been elated by the scientists' indulgence despite whatever the editorial board decides.

It was a hard work to choose the nominees of the best article beyond the others. Since we had to put forward some of them in any way, we spent lots of time by thinking how we could manage this. Our endeavors yielded and we found a way about how we could succeed this election. Articles to be rewarded were elected by the proposal of the editorial boards of both JCAM and ECAM and the approval of the editor. The rewarded articles have been broadcasted via online and e-mails to the readers.

The purpose of these rewards is to share with you at least some of the articles that have been published in our journal, cited internationally and pulled the attentions of the readers intensely. Till today, the articles proposed by the JCAM editorial board beyond the published articles in Journal of Clinical and Analytical Medicine have been rewarded as the "Best Article of the Year" and all our authors regarded this application. We mean to prolong this tradition in years to come (Table 1). The articles deserved to have the "Best Article of the Year" award in Journal of Clinical and Analytical Medicine between 2010 and 2012.<sup>1-21</sup>

**Table 1.** "Best Article of the Year" award in Journal of Clinical and Analytical Medicine between 2010 and 2012.

Year	Best Article of the Year
2010	[1-3]
2011	[4-11]
2012	[12-21]
